

Table of Contents

1. Solving Inequalities
 2. Graphing Linear Functions
 3. Determining Whether a Function is Even, Odd, or Neither, and Whether it is 1-1, Onto, Both, or Neither
 4. Dividing a Polynomial by another Polynomial
 5. Finding Terms of Polynomials Using the Binomial Theorem and Pascal's Triangle
 6. Finding the Zeros of Polynomials
 7. Graphing Polynomials
 8. Graphing Piecewise-Defined Functions
 9. Finding the Vertical Asymptotes of Functions
 10. Finding the Horizontal Asymptotes of Functions
 11. Graphing Rational Functions
 12. Solving Exponential Equations
 13. Converting Between Exponential and Logarithmic Equations
 14. Solving Logarithmic Equations
 15. Solving Logarithmic Equations Using Properties of Logarithms
 16. Graphing Exponential and Logarithmic Functions
 17. Identifying Conic Sections from their Equations
 18. Graphing Parabolas
 19. Graphing Ellipses
 20. Graphing Hyperbolas
 21. Converting Angles Between Radians and Degrees
 22. Finding the Values of Trigonometric Functions at Given Angles
 23. Determining Angles and Side Lengths of Right Triangles Using Trigonometric Functions
 24. Finding the Endpoint of a Vector Starting at the Origin Given its Length and Angle with the Positive X-Axis
 25. Finding the Values of Trigonometric Functions at Points on Lines through the Origin within Given Quadrants
 26. Finding Angles and Side Lengths of General Triangles Using the Law of Sines
 27. Finding Angles and Side Lengths of General Triangles Using the Law of Cosines
 28. Solving Trigonometric Equations
 29. Using Trigonometric Addition and Subtraction Formulas
 30. Using Trigonometric Multiple Angle Formulas
 31. Graphing Trigonometric Functions
 32. Graphing Trigonometric Functions II
 33. Writing Complex Numbers in Trigonometric Form
 34. Using Summation Notation
 35. Finding Sums of Arithmetic and Geometric Series
 36. Finding Specific Terms in Arithmetic and Geometric Series
 37. Finding the Limits of Sequences
 38. Finding the Limits of Functions
 39. Finding the Equation of the Tangent Line to a Curve at a Point
 40. Calculating the Derivative of a Function at a Point
 41. Using Rectangles to Estimate the Area under a Curve
 42. Finding Definite Integrals of Functions
- Answer Key
